For more information on organizing images and placing them into the Organizer window, see Book I, Chapter 2. **Figure 5-1:** This Organizer window provides easy access to your images in many ways. 3. Select an image. Click an image in the Organizer window to select it. The currently selected image appears on the Canvas in the main image window. 4. Choose a method to edit. In Figure 5-2, for example, a photo of a sunset taken on a mountaintop was selected, and the Edit⇒Edit Layers command was chosen to apply an adjustment layer to the image. The adjustment I applied was Levels, which is described in detail later in this chapter. Choose another Edit command, such as Adjust Color, Curves, or Levels, to apply an adjustment to the image. **Figure 5-2:** The levels adjustment is a common, quick way to adjust the brightness, contrast, and hue of a picture. 5.
