About This Game

Join the Company!

It's 2066 and the world is a different place. While the privileged insiders live in fertile domed cities, the rest of us fight for survival in the wastelands. Rival gangs battle for supremacy, turf control and valuable resources. In order for a young man to succeed he must make the right choices about his future. That's why you want to join the Company.

It's on you, rookie. We think you've got the skills, but do you have the guts to go up against the worst maniacs from the lepers, the templars, and the red sixers gangs? We'll give you a piece, a rig, and let you try and prove yourself. No guarantees, but if you pull this off you might have what it takes to be one of us....

30 FPS limit in a action FPS and driving game. No music except for the first track that was on the disc. Its plays only its once. It will go on top of the level intro music so you'll have 2 music tracks playing at once. Then the background track cuts out after about 30 seconds and then you have several minutes of the same rock track playing again, until it goes quite.
Some times there will be no noise at all, because your character doesn't have foot steps sounds.
Crappy low effort port. Don't buy it. It looks nice graphically with hi resolution textures, but that's literally the only thing it has going for it.
