It is a complete guide to the working of Group Policy on Windows 8, Windows 7, Windows Server 2012, Windows Server 2008 R2, Windows Server 2008, Windows Server 2003, Windows XP, Windows Vista, Windows 2000, and Windows Server 2012, and also covers configuring it in Windows 7 and Windows Server 2008. Windows Management Category: Windows administration

Q: fancybox 3 jquery plugin passing parameters I'm trying to pass parameters to a fancybox gallery using jquery3. The gallery should change depending on a value in a radio button. When I click the button, the parameters stay empty. A: I figured out what was wrong. I was using fancybox 3, which uses fancybox version 1, where it's not possible to pass params through the url. IL-4 and/or IL-13 gene-modified mesenchymal stromal cells augment IFN- γ expression and ameliorate acute graft-versus-host disease. To investigate the mechanism of the amelioration of acute graft-versus-host disease (aGVHD) by mesenchymal stromal cells (MSC) modified with IL-4 and/or IL-13 genes in vivo. MSC were modified with IL-4 and/or IL-13 genes and injected into aGVHD mice. The survival rate was determined. In addition, the number of IFN- γ (+) T cells was counted and the level of IFN- γ was determined by RT-PCR. The protein level of IFN- γ in serum was also detected by ELISA.

The results showed that injection of MSC improved the survival rate of aGVHD mice. After IL-4- and IL-4/IL-13-gene-modified MSC treatment, the number of IFN- γ (+) T cells in the spleen increased significantly. The mRNA level of IFN- γ in the spleen increased as well. The protein level of IFN- γ in the serum was increased compared with that in the normal control mice. The IL-4- and IL-4/IL-13-gene-modified MSC suppressed the lymphocyte proliferation and increased the expression of IL-10 and TGF- β in the mice. These results indicated that IL-4 and/or IL-13 gene-modified MSC ameliorated aGVHD in mice
